

Automate. Scale. Optimize.

DevOps: Transforming IT Operations

DevOps is gaining tremendous traction due to its ability to foster continuous improvements, reduce project failure rates, and promote a performance-oriented culture.

According to Statista, 30% of software development companies are implementing DevOps solutions and reaping the benefits of a streamlined release management cycle, faster time to market, and cost-effective scaling. Moreover, to manage market volatility, businesses are increasingly adopting a robust setup that achieves successful Agile delivery with minimal risks.

Nitor is proud to offer customized DevOps services that give your current processes an overhaul. With our stellar DevOps technologies and expertise in automation tools, Nitor's engineers optimize release cycle management costs while ensuring optimal productivity. This results in our rapid product releases and increased product quality.

Present Challenges

High Maintenance

Excess time spent on troubleshooting problems, thus increasing process/application overheads

Isolated Teams

Paucity of adequate collaboration between Development and Operations

Long Defect Resolution Times

Inability to effectively mitigate defects in the development cycle

Our Services

DevOps Assessment and Consulting

Assess your organization's readiness for DevOps and create a personalized roadmap for the DevOps transformation

DevOps Implementation and Services

Automate, optimize, & monitor a project delivery pipeline with Agile methodology, CI/CD tools, and an optimized release management cycle

Architecture Revamp

Re-imagine the next generation of products with expert-verified architecture and end-to-end infrastructure automation

Infrastructure Management

Engage the optimal set of tools to monitor infrastructure, applications, and processes

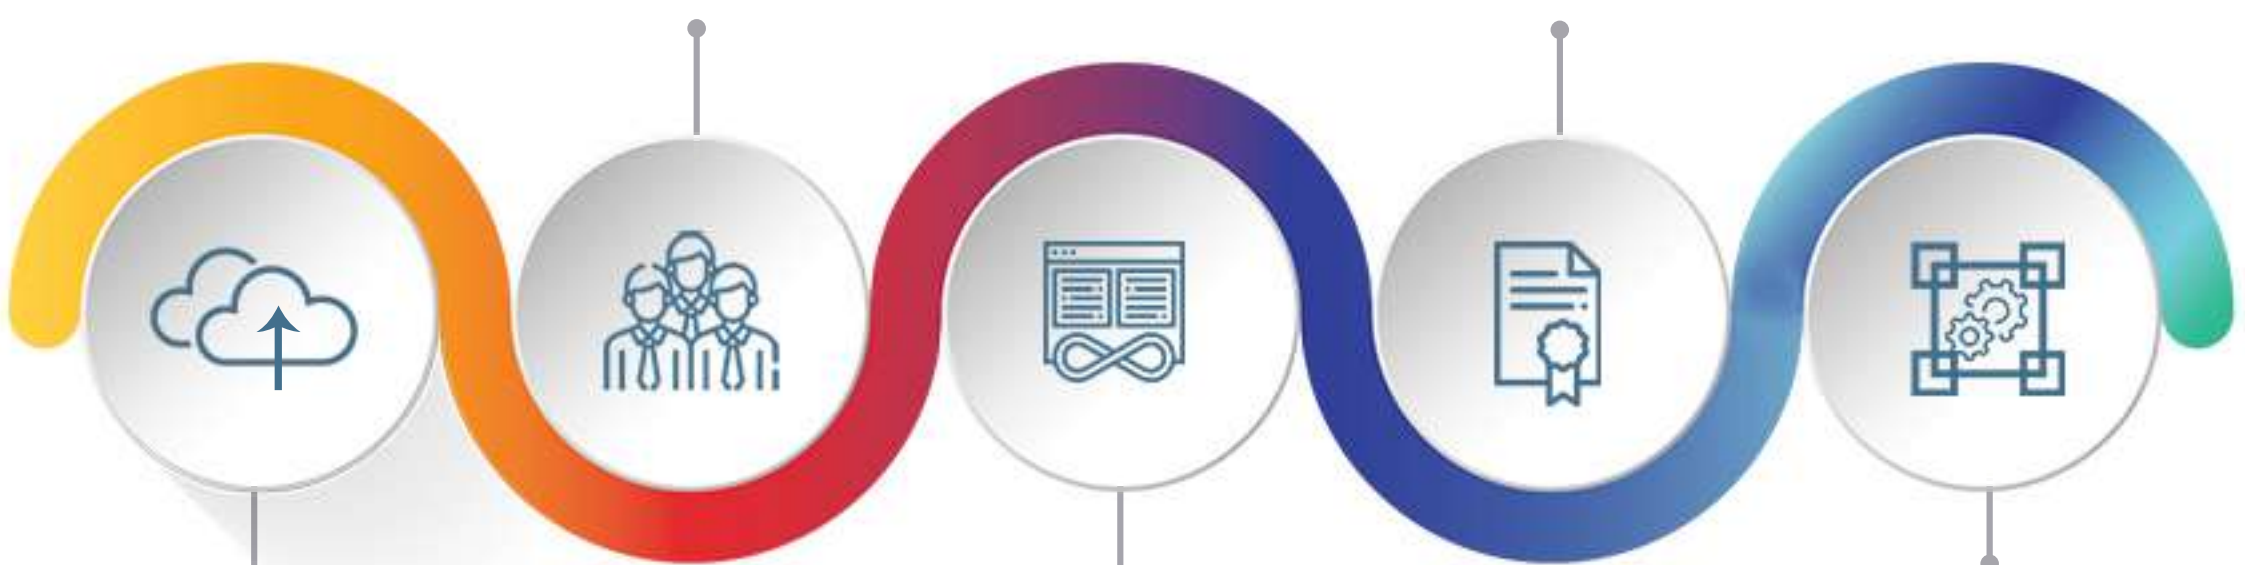

Value Delivered

Experienced Talent

Avail the expertise of AWS and Azure-certified architects and DevOps engineers

Enhanced Security & Compliances

Enhance data security with HIPAA and SOC 2 compliances

Multi-Cloud Support

Address all your Cloud needs with our expertise in AWS, Azure, and Google Cloud

Pervasive DevOps Culture

Experience the finesse of DevOps expertise and implementation, grown through a pervasive DevOps culture of collaboration and extensive hands-on experience

Flexible Engagement

Benefit from flexible engagement models with on-site and offshore arrangements
